

SWAGAT SHANDILYA

9182896730 | shandilyaswagat@gmail.com | [LinkedIn](#) | [GitHub](#)

Data Analyst with 3+ years of experience developing Power BI dashboards, optimizing SQL/DAX workflows, and delivering business intelligence insights across customer retention, revenue reporting, and risk analytics. Experienced in data modeling, KPI reporting, ETL workflows, and translating business requirements into actionable insights.

TECHNICAL SKILLS

Languages: Python, SQL, DAX, M-Language
Data Skills: Data Analysis, EDA, Data Modeling, Data Visualization, Data Cleaning, KPI Reporting, Business Intelligence
Cloud: Azure, Databricks
BI Tools: Power BI service, Power BI Desktop, Power Query, MySQL
Tools & Platforms: Git, Bitbucket, Confluence, SharePoint, Excel, Google Sheets, Google Colab

WORK EXPERIENCE

PwC | Data Analyst Sep 2022 – Jan 2026

Customer Retention & Churn Analytics:

- Developed interactive Power BI dashboards to track customer retention, churn trends, and customer engagement KPIs, enabling business teams to identify high-risk customers and improve retention decision-making.
- Refined dashboard performance by 35% through DAX optimization, reducing load time and improving user experience; enhanced data accuracy by applying advanced DAX calculations and calculated columns.
- Conducted exploratory data analysis (EDA) and cohort analysis using Python (Pandas) to identify customer behavior patterns influencing churn based on recency, frequency, and inactivity metrics.
- Performed SQL-based validation and reconciliation of customer and transaction datasets in Azure Databricks, reducing discrepancies by 20%.
- Collaborated with cross-functional teams and clients, applying technical expertise to deliver timely, high-impact solutions.

Tools used: Power BI Desktop, Power BI Service, Python, Databricks, Azure SQL, SharePoint, DAX

Revenue Analytics & Payment Risk Reporting:

- Built real-time Power BI dashboards supporting KPI tracking and improving collection efficiency by 25% through enhanced billing visibility.
- Performed SQL querying, data validation, and reconciliation in Databricks to analyze payment aging trends, improving data accuracy and ensuring reliable reporting for revenue and collections analysis.
- Streamlined star schema models and DAX measures to improve reporting accuracy; implemented Row-Level Security (RLS) in Power BI Service for secure role-based access.

Tools used: Power BI Desktop, Power Query, DAX, Power BI Service, Databricks, SQL Server, SharePoint

Consumer Portfolio & Risk Analytics:

- Designed Power BI dashboards to analyze policy portfolio, customer distribution, and risk trends, supporting business teams in monitoring performance across insurance lines.
- Created DAX measures and customer segmentation reports to identify cross-sell opportunities across multiple insurance lines and support portfolio analysis.
- Optimized SQL views and Power BI data models to improve report performance and user experience.

Tools used: Power BI Desktop, Power BI Service, DAX, Power Query, Excel, SQL

GS LAB | Data Analyst Intern Oct 2021 – Sep 2022

- Assisted in SQL-based data extraction, validation, and reporting to support business analysis and improve data accuracy across internal systems.

EDUCATION

Post-Graduation in Data Science | CGPA: 9.77 2024-2025
VIT Bangalore
B. Tech Computer Science Engineering | CGPA: 7.56 2018-2022
Lovely Professional University, Punjab

TRAININGS & CERTIFICATIONS

- SkilloVilla Data Analyst Certification:** Completed a comprehensive data analytics program with hands-on experience in Advanced Excel, SQL, Power BI (Power Query, Data Cleaning, DAX, Dashboard Development), Python, data validation, reporting workflows, and ETL concepts.
